

Cathedral concept projection specification

Angle - side view

Night light warm colours & shapes | Animated projectionmapping

Original design employing UCOL 20K Projector | concept >>>

The projection focuses on key events surrounding the Catholic liturgical year. Starting with Advent and ending with Christ the King. Six distinct seasons through abstracted graphic-design-animation will be revealed: Advent, Christmas, Lent, the Sacred Paschal Triduum, Easter, and Ordinary Time. These seasons follow a specific cycle with changing liturgical colours (violet, white, green, red). A spiritual visual reflection will be presented within the mapped light show together with a visual/reality play on the building architecture itself.
